One of the great programs we offer to our member companies is where we, along with our partners at Latitude Subrogation Services, perform a Closed File Review to help identify any potential subrogation. These are on files already closed, therefore it will not interfere with any files currently being handled by your subrogation department.

We will then provide a report to you showing all of the subrogation opportunities that might exist on those closed files. This service is completely free to member companies, and all we ask is that you assign us to go and get your money for you.

In exchange for allowing us to provide you with this service, we will facilitate any full-day workshop from our catalog to you **free of charge!**

It is an extraordinary service that, at the very minimum, can give you a huge head start in increasing subrogation results. What have you got to lose?

Please contact Carl Van, President & CEO at 504-393-4570 or [CarlVan@InsuranceInstitute.com](mailto:CarlVan@InsuranceInstitute.com) with any questions.
